Racor O

The World's Best Filtration Starts

Ask a sailor about engine protection, about filtration or about reliability and performance. Whether they are a captain of a superyacht, sailboat, fishing boat or tug, the chances are the one-word answer will be the same as it has been for over three decades...Racor. Delivering the quality and reliability mariners most respect is a customer-driven effort at Racor. We view every marine vessel, and the sailors who depend upon them for livelihood or leisure, as a personal responsibility. Products that are the result of computer-aided design and stringent manufacturing processes, solidly built to withstand the rigors of the marine environment. This commitment to uncompromising quality has earned Racor a global reputation as the most trusted name in engine protection.

n Board

with the World's Best Engineering

Keeping water and contamination out of fuel has been the focus of a Racor research and development effort that started with the Turbine Series. Advancing the science of filtration and adding convenience resulted in the development of the popular Spin-On Series for diesel and gasoline engines. Today, Racor has these products and many more to offer mariners including cleanable filters which replace standard oil filters with easy-to service, permanent systems; crankcase ventilation filtration systems that keep engine rooms free from oily blow-by; and synthetic water-repelling engine air filters guaranteed to provide twice the service life. There are water-absorbing hydraulic filters, unique fuel/air separators that prevent harmful vent line overflow during refueling, a full line of fuel additives and filters to keep drinking water pure and odour free. Along with engine shutdown systems and high-flow fuel filtration systems, these thoughtfully designed products have made Racor the preferred brand around the world.

Parker Hannifin Corporation

Aerospace Group

A leader in the development, design, manufacture and service of control systems and components for aerospace and related high technology markets, achieving profitable growth through premier customer service.

Climate & Industrial Controls Group

Designs, manufactures and markets system control and fluid handling components and systems to refrigeration, air conditioning and industrial customers worldwide.

Fluid Connectors Group

Designs, manufactures and markets rigid and flexible connectors and associated products used in pneumatic and fluid systems.

Instrumentation Group

A global leader in the design, manufacture and distribution of high quality critical flow components for worldwide process instrumentation, ultra high purity, medical and analytical applications.

Automation Group

A leading supplier of pneumatic and electro mechanical components and systems to automation customers worldwide.

Filtration Group

Designs, manufactures and markets quality filtration and clarification products, providing customers with the best value, quality, technical support and global availability.

Hydraulics Group

Designs, produces and markets a full spectrum of hydraulic components and systems to builders and users of industrial and mobile machinery and equipment.

Seal Group

Designs, manufactures and distributes industrial and commercial sealing devices and related products by providing superior quality and total customer satisfaction.

The name to trust in filtration
